

NEWS UPDATE

INTERSOLAR 2008

Our exhibition trip to the Intersolar 2008 was a success. Intersolar is Europe's largest international trade fair for solar technology. Through this exhibition, we have taken the opportunity to showcase our innovative products and solutions to the renewable energy community.

Situated at the Outdoor Exhibition Area, **Booth FG.350**, we received overwhelming response from prospective customers and green energy advocates on our products and services.

As the only ASEAN Company that has participated in this exhibition, we would like to say big **THANK YOU** to you who have visited us during the exhibition. We enjoyed talking to you and we look forward a potential cooperation with you.
